

RADLEY

CORPORATION

Product Profile

- Combines the power and speed of the Intel® XScale™ processor and the Microsoft® Pocket PC operating system
- Large, Reflective TFT color display provides crisp, vivid screen contrast both indoors and out
- Highly configurable, allowing up to 3 wireless communication options in the same device
- Rugged, ergonomic design combines advanced battery power for full-day use
- Available with either integrated imaging or laser scanning technologies
- Numeric and full alphanumeric keypad options
- Part of the comprehensive solution including printers, application software, communications infrastructure products, peripherals, and accessories

Serious Enterprise Mobility

Whether on the road, in the field, or on the factory floor, mobile workers demand rugged, reliable tools to do their jobs. The Intermec® 700 Color mobile computer builds on the rock-solid 700 Series platform, updated to bring the newest technologies to the front-line worker.

Beyond the large, brilliant display, the 700 Color offers the Intel® XScale™ processor and Microsoft® Windows® for Pocket PC. Its configurable design allows the integration of up to three radios in a single device, provides a broad range of scanning options, two keypad options, and backs this up with market-leading battery capacity to ensure long life. Whether your application is stand-alone, client-server, browser-based, or terminal emulation, the 700 Color is the right tool for the job.

Daylight Readable Color Display

The 700 Color features a brilliant Reflective TFT display that provides superior clarity and vivid contrast under all lighting conditions – both indoors and out. The 3.8 inch (97 mm) diagonal display, is 20 percent larger than most other devices on the market and lends itself to larger character and graphical applications, thereby promoting better viewability. From simple highlighting of a data entry field to presentation of full-motion video, the color display helps users work more efficiently.

Multi-Purpose Application Platform

Change is a constant in the business world. When investing in an automation solution, you want to select a device that will meet not only your current needs but has the capacity to grow with you as your needs expand. The 700 Color is such a device.

Start simply by moving your current applications to the device and add more applications or job functions when you are ready. The power of the Microsoft Windows for Pocket PC operating system, combined with the speed of the Intel XScale processor, means you'll have the capacity you'll need. The 700 Color is your partner for the long haul, and is designed to accommodate your ever-changing mobile computing requirements.

Rugged Integrated Package

Intermec is a world leader in the design of mobile computing hardware that stands up to the most rugged usage demands, and the 700 Color carries on this proud tradition. Designed from the ground up for use in harsh environments, the 700 Color can withstand multiple 5-ft. (1.5 m) drops to concrete and is sealed against rain and dust. The ergonomic case design is sculpted and balanced for user comfort in long-term use; radio and scanner options are integrated, not add-ons, which means they are tested to the same ruggedness standards and don't compromise the environmental or functional characteristics of the unit.

Scaleable Communications Options

The wide range of communication options on the 700 Color provide wired and wireless connectivity unmatched in the industry. On-board wired Ethernet is standard on the 700 Series, and unlike many competitive devices, true Ethernet

speeds are maintained all the way to the device. Other communication options include:

- **Wireless Local Area Network (LAN)** integrated into the 700 Color, this 802.11b radio option provides up to 11 Mb/sec throughput
- **Wireless Wide Area Network (WAN)** integrated options include radios for GSM/GPRS and CDMA/1xRTT networks
- **Bluetooth™* Compatible Personal Area Network** allows cable-free communications over a 10 meter range with peripheral devices such as printers. Bluetooth compatibility is provided by a Socket Communications module.

For applications that require wireless connectivity in multiple environments, the 700 Color can be configured with up to three radio options in the same device. For instance, workers may spend part of their day on-premise utilizing wireless LAN access points, for cross docking or load planning applications. The same device could also utilize a WAN network when taken off-premise in a delivery vehicle, covering a much larger area, all the while using Bluetooth compatible networking to print. Whatever your communication requirements, the 700 Color has you covered.

Comprehensive Scanning Options

Offering a broad choice of scanning options, the 700 Color is available with imaging or laser scanning technologies. The imager options provide for the ability

to read 1D, 2D matrix codes and stacked symbologies. In addition, the imaging technologies allow for omni-directional decoding, eliminating the need to line up the scan beam perpendicular to the bars. The area imager also provides the capability of taking black and white photographs for applications such as proof of delivery, market surveys and field inspections. Linear 1D and PDF417 laser scanners complete the scanning lineup.

Superior Power Reserves

Color display frontlights and a multitude of radios can tax the power budget of any portable device. To provide trouble-free operation and maximum uptime throughout the day, the 700 Color comes equipped with a powerful 14.4 Watt-hour Lithium-Ion battery making the 700 Color the industry leader in power management. In addition, the built-in Flash ROM folder allows permanent storage of applications, drivers and start-up files on non-volatile flash memory.

Complete Systems That Work

The 700 Color is part of a suite of fully-integrated system components, including a wide selection of peripherals and accessories. Intermec systems are designed to meet the needs of the enterprise, incorporating features to support automatic loading of application software that lower total cost of ownership. Applications and communication software products are also available to address business process automation needs – including software to remotely configure and manage devices from a central location. The Intermec 700 Color can help businesses worldwide improve their operations, increase mobile worker efficiency, and build a better bottom line.

Physical Characteristics

Length: 191 mm (7.53 in.)
Width: 90 mm (3.5 in.)
Height: 50 mm (1.97 in.)
Weight: 483-568 grams (17-20 oz)
 depending on options

Environmental

Operating Temp:
 -10° to +60°C (+14° to +140°F) application dependent
 0° to +40°C (+32° to +140°F) for Bluetooth compatible devices
Storage Temp:
 -20° to +60°C (-4° to +140°F)
Relative Humidity:
 5% to 95% (non-condensing)
Rain and Dust Resistance:
 IP64 compliant
Drop Spec: Withstands 5' drop, 26 times onto concrete

Power

Battery Type: Lithium-Ion, 7.2V, (2 x 2000 mAh cells), customer replaceable
Battery Capacity: 14.4 Watt-hours
Battery Life: 6-10 hours, application dependent
 Recharging Time: 4 hours

Operating System

Microsoft® Windows® for Pocket PC

Microprocessor

Intel® XScale™ Processor, 400 MHz

Memory and Storage

RAM Memory: 64 MB (128 MB optional)
Flash ROM: 32 MB; includes ROM folder for application storage

Internal Slots

- Secure Digital (SD)
- CompactFlash (CF) Type II

Display

Reflective TFT daylight readable color display with CCFL frontlight, 240x320 pixels, 3.8 in. (97 mm) diagonal, 64 K colors

Standard Communications

RS232, IrDA 1.1 (115 kbps)
 10 Base-T Ethernet
 USB

Integrated Radio Options

LAN: 802.11b (Wi-Fi certified)
WAN: GSM/GPRS, CDMA/1XRTT
 Bluetooth™ compatible module

Modem

- Optional V.90 modem snaps on to 700 Color
- Mini-land line external modem

Integrated Scanner Options

- Area imager
- Linear imager (available mid 2003)
- 1D laser
- PDF 417 laser

Imager Scan Engine Specifications

	Minimum (in.)	Maximum (in.)
7.5 mil	4.00	8.50

About Intermec...

Intermec Technologies Corporation, a Unova Company, is a global leader in the development, manufacture and integration of automated data collection, wireless systems, terminals, mobile computing, printers and media. Our products and services are used to improve productivity, quality and responsiveness of business operations in multiple industries. Intermec has served customers since 1966.

In addition to comprehensive solutions for mobile computing, we provide products and services within these categories:

- Data capture scanners and wedges
- Wireless Local Area Networks (LANs)
- Wide Area Networks (WANs)
- Personal Area Networks (PANs)
- Handheld, vehicle & fixed-mount terminal solutions
- Label and media supplies
- Printers
- Emerging data collection and management technologies including smart card and RFID tags
- Software-based solutions
