Operating System:

Windows Mobile

Windows CE (check for version)

Memory & Storage:

256 MB RAM   •   1 GB Flash ROM

Keypad Options: Alphanumeric

Wireless Communications:

RF Capable

QuickShip Shipment Scanning extends *i*CARaS functionality to your shipping dock! Achieve maximum efficiency, and improve shipment and ASN accuracy, through automated data collection, ongoing data verification and intelligent process improvements. Empower your workforce to meet your industry and customer requirements, and blow away your competition.

- Serial/Lot # Tracking
- Master/Mixed Labels
- ASN Compliance
- Shipping Verification
- Customer and Industry Compliance

Optimize efficiency!

QuickShip enables you to perform shipping functions from a mobile handheld scanning device right on the shipping dock. No more running back to the office to complete your process. Create master labels, scan & verify, print your shipping documents and send the ASN all from your handheld device.

- Easy to use — the software guides you through the scanning process.
- Supports scale integration and end-of-line labeling.
- Historical Record — capture and retain shipment data.
- Ability to track internal lot/serial numbers to meet your traceability requirements.

Labeling Expertise Included

Radley offers the experience and expertise to provide you with a labeling solution capable of meeting your most stringent shipping label requirements. Create your own label formats or purchase off-the-shelf labels from Radley's extensive library.

*i*CARaS **QuickShip** is built around the latest AIDC technologies. From bar code printers, labels or other media, to scanners, intelligent portable terminals, Radio Frequency (RF) systems and more, we can help you choose the hardware and devices that will best fit your needs. Our partnerships with select recognized industry leaders enable us to provide a fully integrated total solution.
