## The VALUE in Radley Solutions—Expand Cityworks Functionality

### Re-Engineer Your Processes for Optimum Efficiency

From improving inventory control, to managing assets, to simplifying procurement transactions and vendor invoices, Radley's platform of pre-built, configurable and scalable solutions will help you streamline your daily operations, consolidate tasks, and automate workflows in order to do more with less – all within a Cityworks-centric environment.

### Solutions for Workforce Productivity

From Automated Data Collection to business-to-business EDI, Radley's knowledgeable and experienced team is committed to providing a platform of solutions worldwide. Radley's platform of real-time warehouse solutions is a mobile computing and data collection system that can help you automate your unique business processes without costly consulting services and customizations.

Optimize your processes by completing them in the order best for your organization and allow Radley to consolidate numerous tasks into one simple workflow.

CORPORATION

## Optimizing Your Operations

Our user interface was built for maximum worker productivity, easy-to-use and multi-lingual. By streamlining data entry and daily operations as well as automating material handling transactions, users follow the simple software prompts as Radley technology is busy behind the scenes validating data and processing multiple transactions at the same time.

Receive instant error alerts and email notifications so personnel can take action while it still matters. Implement Radley solutions and look forward to your workforce operating at maximum productivity, production costs lowered and overall efficiency increased, all while continuing to grow your business.

## Inventory Control

Improve your ability to monitor and evaluate your Cityworks Storeroom inventory through Radley's easy-to-use software. Radley's Inventory Control solution can capture barcode data including bin location and quantities. Scan multiple items or barcodes in succession, then issue to an employee, account or work order.

With Radley Inventory Control you will know in real-time exactly how much of each part, item, material or kit is on hand, from the warehouse or on your desktop. Receive, Issue, Move and Transfer inventory using a hand-held device with a touch control UI, compatible with Windows or Android operating systems.

Tap into even more functionality using Radley's Integrated Labeling. Quickly generate accurate barcode labels for each stage of your workflow, from check-in, to kitting to shipping.

---

*Automate your business processes without costly consulting services and customizations.*

## Asset Tracking

Integrate to your business system for real-time validations and updates of asset data. Easily analyze status of containers, specialized tools, equipment, totes and more from one configurable dashboard. Manage and control critical assets within your warehouse operations. Minimize down-time, reduce labor costs and eliminate manual efforts by automating your asset tracking processes.

## Data Collection

Real-time transaction processing that offers so much more than just the scanning of barcodes. Radley's configurable, user friendly interface will change the way you think about mobile data collection. Ensure the accuracy of your business system by eliminating manual, handwritten labels and bypass time-consuming paperwork by scanning the critical data required for you to make important business decisions.

Radley's technology preserves your configured business logic and validates scanned

# Cityworks Storeroom

data against the database, updating Cityworks with each transaction, as it happens, in real-time. Collect data from barcodes, tags and RFID portals by connecting multiple systems, databases, equipment and machines. With compatibility on Android and Windows platforms, use Radley solutions to track data at your desk or on the go.

## Kitting & Containerization

Dramatically improve material handling with Radley's Kitting/Containerization solution by building up pallet/container relationships for the Receipt, Movement, Issue and Shipment of materials and products. Move entire pallets of inventory and stage them for shipment with only one scan of a mobile device while Cityworks is updated with the data of every container, pallet and part within.

*Eliminate manual tasks and bypass time-consuming paperwork.*

## Task Management

Maximize on resource time by letting Radley monitor operating conditions, item locations and quantities based on your business rules and logic to optimize pick routing, space utilization and replenishment. Users are directed to perform tasks based on their status and location within the warehouse, ensuring the worker is always at their highest productivity.

## Labor Tracking

Keep tabs on all your resources, both human and machine with Radley's Labor Tracking solution. Automatically collect time metrics against jobs, tasks, projects and work orders allowing labor and machine performance be measured, analyzed and reported against.

## EDI Software & Services

Take control of your EDI processes with Radley's business-to-business solution iR\*EDI to proactively manage your supply chain, eliminating manual entry and simplifying inbound and outbound activities. iR\*EDI can be deployed On Demand, On Premise or On Any Cloud.
