

IloT SOLUTIONS

- ✓ Increase Overall Productivity
- ✓ Improve Data Integrity
- ✓ Measure Efficiency
- ✓ Quickly Identify Problems

Connectivity to Maximize on Your Data

The IoT, and Industrial IoT, are becoming a part of our everyday life, from our homes to our workplaces. The Internet of Things (IoT) focuses on connectivity for consumers through connected smart phones, cars or even appliances. For manufacturers, the Industrial Internet of Things (IIoT) connects devices to provide greater data visibility, improve performance or enable automation.

The IIoT is nothing new to Radley. For decades, Radley's solutions for integrated data collection have helped manufacturers gain real-time visibility to their processes, automating tasks and increasing efficiency along the way. Now we bring our expertise together with today's world of internet-connected devices and Cloud computing. From monitoring machine downtime and maintenance, to regulation compliance and quality control, Radley brings the IIoT together to truly maximize on your data.

RADLEY

A CAI SOFTWARE COMPANY

ERP & Systems Integration

Radley Integrates to:

- Major ERPs
- Open web services
- GTIN and Label software
- FedEx Shipping
- KanBan
- Kepware
- MES & WMS Systems
- SQL databases
- ADP/Payroll/HR Systems/QuickBooks
- Custom APIs, business applications & screens
- Legacy Systems

Radley's built-in web services and APIs provide an easy integration to almost any business system.

With Radley, there's no need to manually sync your data. Maintain a single system of record, while Radley is busy

Collect data at every point in your manufacturing process.

behind the scenes validating data and updating your ERP.

Device Integration

Radley solutions integrate with multiple systems, databases and machines to collect data at every point in your manufacturing process. Collect, validate and analyze the key information you need to gain efficiency, increase productivity and optimize work-flows. With Radley, almost anything can be a device!

- PLCs
- RFID
- Automated Retrieval Systems
- Scales, Palletizers, Transport Sleds, Tanks
- Automated Handling Equipment
- Proximity Sensors
- Carousels

Benefits

- ✓ Calculate key performance indicators from your shop floor in real-time
- ✓ Track machine and user activities and events without the complexity of multiple systems
- ✓ Eliminate waste and decrease down time for a more efficient manufacturing facility
- ✓ View OEE and OLE metrics from the dashboard—without the need for manual calculations
