

# Create a Smarter City with Automated Inventory Control

Radley Inventory Control helps smart cities save money, increase efficiency, and maximize the value of their investments by automating their inventory counts and control.

Our software and hardware integrate with your existing systems to help you locate, track, and maintain accurate information on all your equipment, supplies, and assets.

- No more spreadsheets or manual data entry
- Automatically track all your assets and supplies
- Streamline inventory transactions and cycle counts
- Maintain ideal stock levels for each item and location
- Eliminate errors, overstocks, and out-of-stocks
- Automate your receipts and movement transactions
- Maintain supplier information for each item
- Increase visibility into your inventory and costs

## Control Your Inventory with Ultimate Flexibility

### Smarter Inventory

Control your inventory so you can deliver better services, create more efficient government, and achieve significant cost savings.

### Easy Visibility

Streamline your receiving, label printing, inventory tracking, and cycle counting from a single easy-to-use interface on a desktop PC or handheld mobile computer.

### Custom Flexibility

Customize fields, labels, and dashboards to fit your unique needs and processes. There's even a multi-language interface.

# Inventory Control in Detail

## Detailed Inventory Tracking

With Radley Inventory Control, you'll know in real-time exactly how much of each asset, part, item, or supply is on hand—no matter where it's located. You can track finite, granular inventory details through easy-to-use transactions.

- See the inventory of any item at a glance
- Conduct powerful queries and searches
- Set min/max inventory quantities with alerts
- Set counting rules and tolerances
- Manage expirations and life cycles
- Define item groups or classifications
- Manage supplier and customer information
- Get support for multi-organizational structure
- Manage multiple units of measure and conversion

## Flexible Real-Time Reporting

View standard reports or connect Inventory Control to Crystal reports or your SQL database to create your own custom reports. Easily view your inventory levels and audit trails, and track transactions to order numbers, personnel activity, parts/materials, and more. You can also export your data to Excel or your ERP or other business systems.

## Custom-Tailored Processes

Control your inventory in the way that works for you. Configure fields, labels, and dashboards to suit your terminology and needs. Convenient transaction prompts define where and when to populate data, and there's a multi-lingual interface you can assign by individual user login.

## Security You Can Trust

Radley Inventory Control includes the latest security features to handle confidential and sensitive data. Access to your inventory and data is determined by user roles with configurable certifications, skill sets, and transaction access.

## Powered by Zebra Mobile Computers

Radley Inventory Control runs beautifully on Zebra Android touch mobile computers, the next generation in mobile efficiency and smarter workflows for cities around the world. Zebra devices deliver business apps, barcode scanning, and powerfully secure wireless communications in a touch screen device engineered for rugged mobile performance.
